HYDROPONICS®**

Bringing Nature and Technology Together

**Flora  
Kleen**

**FloraKleen™** is formulated to remove fertilizer residue that can accumulate in hydroponic systems, growing media and potting soils over time.

Use **FloraKleen™** monthly to maintain your hydroponic system or potted plants and eliminate excess salts that can accumulate over time from regular fertilizer application.

Dissolves away accumulated fertilizer salts.

Reduces plant stress from excess and imbalanced fertilizers.

Releases nutrient bond between plant and system.

Use **FloraKleen™** as a final flush a few days before harvest.

Safe for hydroponic systems and media while plants are growing.

**KEEP OUT OF REACH OF CHILDREN**

Clearing Solution

**Specimen**

**Flora  
Kleen™**

**DIRECTIONS**

**Hydroponic systems:**

• **Between nutrient changes:**

Mix 1 to 2 teaspoons per gallon water. Use milder solution for young or fragile plants, stronger solution for older and stronger plants close to harvest.

Recirculate in hydroponic system for one to two hours. Drain and refill hydroponic system with fresh nutrient solution.

• **Final flush before harvest:**

Drain old nutrient solution and discard. Refill hydroponic reservoir with fresh water and mix 2 teaspoons **FloraKleen™** per gallon water. Run this solution during last day or two before harvest.

**Potting Soil & Soilless Mixes:**

• Fill a watering can with fresh water and add 1 to 2 teaspoons **FloraKleen™**. Drench until there is runoff from the bottom of the pot. Resume your regular fertilizer schedule with the next watering.
